

Air Coil Series

INTER OUTSTANDING ELECTRONICS

The Coil is the key to make the electronic magnetic field, according to different purpose, the shape of the soil is varied. With the development of science and technology, the upgrading of products, more need to speed up the development of the pace of work, application field coil is infinite.

Air coil inductor is mainly applied the inductance receiver, focusing, magnetic, magnetic current coil, low voltage electrical appliances, industrial control, home appliances, automotive electronics, mount SMT, mobile phone, wireless transceiver, electronic navigation device, power regulator, amplifier, supply and filtering field.

Electronic characteristics can be designed per customer's request.

These data are for models selection. For detail specifications and customized requirement, please contact IOE
